

28th August 2021

To Whomsoever It may concern

It's always my pleasure to support my students to grow and develop themselves, specifically when they wish to pursue higher studies. With the same feelings I am writing this letter for **Mr. Jagrit Acharya**. This letter can be accepted for his admission application in postgraduation.

Jagrit is known to me from last 2 years as undergraduate student enrolled for Bachelor of Technology (Computer Engineering) at Mukesh Patel School of Technology Management and Engineering, SVKM's NMIMS University, Mumbai, Bharat (India). Academically he has been very sound. His nature of curiosity and constant efforts to prove himself makes him different than his peers. He loves programming. He can code well to solve any given problem using computer programming. I have always found him to be very interactive in class. Although it was tough for all of us to manage virtual classes at one point of time during COVID outbreak, he has ensured his complete involvement in my course.

Urge to work and solve problems using programming has made him an essential contributor in multiple projects during his studies. He has worked on projects such as Hyperledger Aries framework to implement secure identification and authentication procedures, decentralized identifiers (DIDs) and Verifiable Credentials (VCs) to provide secure validation. He has also worked as a freelancer and developed Hotel's website using Django and Postgresql and Mobile App using Flutter and Firebase. Jagrit is a good team player and communicator. He can convince anybody with his strong communication skills. He has very good leadership skills. He has reviewed 50+ Pull Requests and provide suitable feedback on the code written by participants, took more than 10 sessions to teach participants the best practices of coding and he has also worked with a team of 10 members and lead the program smoothly with involving more than 300 people.

I am sure Jagrit will be successful in his chosen field of study. I wish him all the best for his future endeavors.

Dr. Dharendra Mishra
Professor, Computer Engineering Department
Mukesh Patel School of Technology Management & Engineering
SVKM's NMIMS University
